ZOOM SECURITY

1

- This class will apply to users of PCs and Macs. While some security tools are available on mobile devices, it is a very difficult task to protect a room on a small screen.
- A basic knowledge of Zoom hosting is assumed.
- Except where noted, “Host” also refers to “Co-Host.”

NOTES

2

<p>1. Maintain safety while upholding our traditions.</p> <p>Tradition 3: The only requirement for OA membership is a desire to stop eating compulsively.</p> <p>Tradition 5: Each group has but one primary purpose: to carry its message to the compulsive eater who still suffers.</p> <p>2. Relax, knowing that you know how to handle situations if they arise.</p>	<h1>GOALS</h1>

Users who come in and say they work for Zoom, e.g., named “Zoom Administrator.”

Nobody who works for Zoom is coming in your meeting.

Users who ask you to make them co-host so they can help you

Don't make a co-host unless you see who they are.

Scout comes and sends or posts meeting link.

Use the Waiting Room and only let in one unknown person at a time. Don't “Admit All.”

TRICKS

5

DO distinguish between legitimate members and actual intruders.

There may be a legitimate member you don't know.

You can't tell by names. Not everyone knows how to rename themselves.

You can't expect folks to turn on cameras or speak. Not everyone has a camera or mic.

Keeping potential newcomers out is against the traditions.

DO ADMIT EVERYONE.

DOs

6

<p>Don't assume because you don't recognize the name, they are an intruder.</p> <p>Admit them and keep an eye on them, or limit permissions temporarily.</p> <p>Don't assume because someone has a generic name that they are not legitimate.</p> <p>Offer to change their name for them.</p> <p>Don't keep people waiting too long in the waiting room.</p> <p>Make enough trained co-hosts or limit permissions temporarily.</p> <p>Don't ask meeting leaders to also do security.</p>	<h1>DON'Ts</h1>
---	-----------------

7

<p>If you "remove" a member, they will not be able to come back into that meeting. Be careful who you "remove."</p> <p>If you stop someone's video, they will not be able to restart it themselves. They will have to ask you to do it for them.</p> <p>If you do not let people unmute themselves, you will have to assign a host to do that for them.</p> <p>If you don't allow renaming, a co-host will have to do it for participants.</p> <p>You can't delete chat.</p>	<h1>WARNINGS</h1>
